Connect to the Linux VM via RDP

Details needed

Item	Value
VM Public IP	<VM-Public-IP>
Username	<username>
Password	<password>

Windows

1. Press the **Windows** key, type **Remote Desktop Connection** and open it.
2. In the **Computer** box, enter `<VM-Public-IP>` and click **Connect**.
3. If a certificate warning appears, click **Yes**.
4. On the blue xrdp screen, set **Session** to **Xorg**.
5. Enter your **username** and **password**.
6. Click **OK**. The Linux desktop opens.

Mac

1. Open the **App Store**, search for **Windows App** (formerly Microsoft Remote Desktop) and install it.
2. Open **Windows App** and click **+** > **Add PC**.
3. In **PC name**, enter `<VM-Public-IP>`.
4. Under **User account**, choose **Ask when required**, then click **Add**.
5. Double-click the new PC to connect. If a certificate warning appears, click **Continue**.
6. On the blue xrdp screen, set **Session** to **Xorg**.
7. Enter your **username** and **password**.
8. Click **OK**. The Linux desktop opens.
